Elective Courses Catalogue for S-MEC-E-18 (Marketing Management - level 3)	42

Semester packages marked with \* are at Bachelor Top-Up level and have special admission criteria. Please read more in the relevant chapters.

# STRUCTURE OF PROGRAMMES

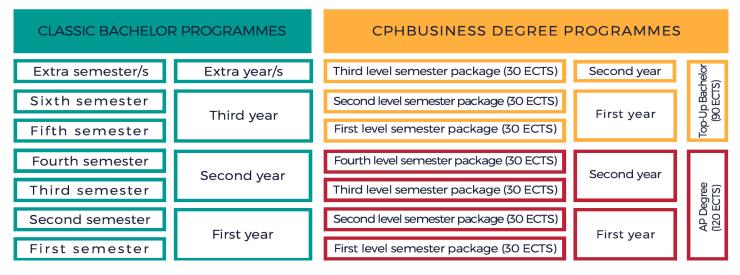

At Cphbusiness, the students can apply for two kinds of programmes:

- AP Degrees (120 ECTS) equivalent to the first 2 years of a classic Bachelor programme
- Top-Up Bachelors (90 ECTS) equivalent to the last 1,5 years of a classic Bachelor programme

Each AP Degree (with its specific combination of subjects) prepares students for admission to one or several Top-Up Bachelors. This means students must fulfil specific academic requirements when applying for a semester at a Top-Up Bachelor programme.

All programmes are divided in semester packages of 30 ECTS. Incoming exchange students must choose a whole semester package (30 ECTS) for their study abroad period at Cphbusiness.

Please see below a comparison between a classic bachelor programme and the structure of programmes at Cphbusiness.

# **TEACHING METHODS**

The teaching and exams at Cphbusiness are often **interdisciplinary**. Tt is **not possible** for students to select individual courses/classes of one educational programme and combine with other courses/classes of another programme in order to compose a tailor-made study programme.

Interdisciplinary teaching means "classic" subjects might be replaced (both in the curriculum and in the timetable) with themes or focus areas. A theme may be for example "Understanding the market", where students will learn and apply theories and models from different disciplines, applying to the business market.

Students have responsibility for their own learning. They have to prepare for teaching in advance by reading relevant literature. They will be placed in a group (usually with students of different nationalities and backgrounds) and together they will have to solve cases inspired by the real business world, with the help of the theories and models studied.

Lecturers at Cphbusiness are facilitators. Their role is often to guide the students and ensure correct understanding and application of theories and methods. In the learning situation, the lecturer will assist the group in correct understanding of the problem they need to solve and make sure they understand and use correct theories and models.

All semester packages described in this course catalogue will be offered in the autumn semester 2018.

Before you start your semester, please read about the Study Environment at Copenhagen Business Academy.

# **EXAM FORMS AND GRADING SYSTEM**

### Exam forms

Most exams at Cphbusiness are interdisciplinary and they can take many forms:

- 1. Written exams, which can take several forms: short multiple choice exam or written exams with open questions, lasting up to six hours\*.
- 2. Oral exams, which can be based on written work/projects written by a student individually or by a group of students

The written work/projects can take different forms, e.g. it can be a specific case given to one student /group of students by a lecturer. Both case / project work and presentations can be made in multicultural groups or individually.\*

\*Please note these are only examples, several forms of exams may apply, depending on study programme and semester

"Interdisciplinary" means that students are expected to apply theories and models from several subject areas in order to answer questions, solve cases or write projects.

Sitting exams in groups of several students ("multicultural groups") means all students in a certain group will be responsible for solving a case, writing (and presenting) a project or answering a question, thus determining (part of) the outcome of the exam (the grade).

The oral presentations (performed either individually or in groups) form the basis of a discussion between students and lecturer (and / or external assessor), which may take its point of departure in the written product (project or case solution) submitted by the students but will not be limited to this.

This means that, regardless of the form of the exam, students are expected to master all theories and models studied during the semester and be able to answer questions, which are not necessarily directly related to the contents of the case/project, they might have submitted.

### Exam dates

Exam catalogues and timetables (dates) will be displayed at the electronic student platform Moodle as soon as possible after semester start.

Students are advised NOT to buy their homebound tickets until they know the exact date of their final exam (or re-exam if necessary, please see below).

# Failing exams

In case of failing exams, students have to sit 2 re-exams. Usually the first re-exam is scheduled up to 2 weeks after the (normal) exam and right before the official end date of the semester.

### More information

More information is provided in the "Examination Regulations at Cphbusiness" document available on our website here. Programme and semester specific information will be available for students after semester start in the "Exam catalogue" of their own study programme. It is the students' own responsibility to collect and read relevant information about exams before these take place and in good time to allow proper preparation.

Exams at Cphbusiness are graded according to the Danish 7-Point Grading Scale or with "pass / no pass". A "pass / no pass" will be awarded to students at the end of a semester, where no formal exams are organized, according to a specific set of criteria defined by lecturers.

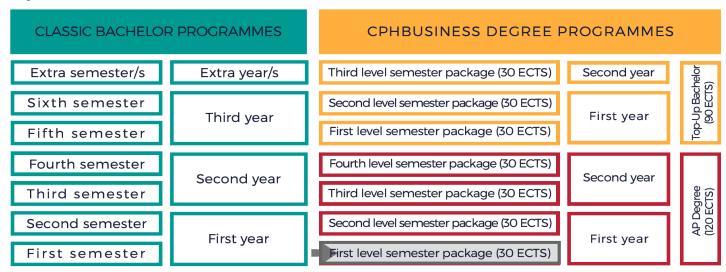

# **Courses in Marketing Management**

# S-MEC-1-E-18 (Marketing Management level 1 Søerne)

The courses of this semester package take place at Cphbusiness Søerne (Nansensgade 19, 1366 Copenhagen K) during the autumn semester 2018.

# 1. An illustration of the level of the semester package

The first semester of the AP Degree in Marketing Management is equivalent to the first semester of a classic Bachelor degree.

# 2. Admission requirements

# Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

### 3. Information about exams

The first semester of the AP Degree in Marketing Management finishes with a group-based case exam, where groups of students get 48 hours to solve a case. This is followed by an individual oral exam. The case and oral exam cover all subjects mentioned in the table below, which means all 30 ECTS points of the semester.

For general information about exams and grading scale, please check the relevant chapter.

# 4. Description of subjects

At Cphbusiness, we use different methods of teaching. The common denominator is that the students get to use the theories and models in a practical context. We do that by working with cases, exercises and projects that incorporate the tools in a real life situation.

As students advance from theme to theme (see the table below), new materials build on the lessons learned from previous themes and advance the student's competencies and knowledge by working with a multidisciplinary approach.

In order to ensure progress, a number of Obligatory Learning Activities (OLA) planned and conducted during the semester. The 5 OLA's per semester allow the students to deliver assignments and/or projects and receive feedback from their teachers, which help them reflect on their progress.

	Theme 1: Business Understanding	Theme 2: Market Understanding	Theme 3: Methodology
Marketing (13 ECTS)	Business model (exemplifying through different types of companies) Mission/vision Value chain Generic strategies	Marketing audit External analysis: PEST Competitors' analysis Porter's 5 Forces Customer analysis Buying behaviour STP; Segmentation, Targeting and Positioning	Marketing research process:  Desk research (data search and understanding)  Field research (qualitative and quantitative)  Statistics  Forecasting  Population/sampling  Determination of sample size
	(1 ECTS)	(6 ECTS)	(6 ECTS)
Economics (5 ECTS)	Accounting	Microeconomics: Supply and demand Elasticity Market forms Production and costs Descriptive- and macroeconomics: Population Labour market Income	Use of spreadsheet tools Ratios preparation and analysis Presentation of quantitative data Benchmarking ABC (Activity Based Costing)
	(1 ECTS)	(2 ECTS)	(2 ECTS)
Business Law (2 ECTS)		Types of companies Personal data protection Replacement and product responsibility Intellectual property Sources of law and legal information search (2 ECTS)	
Communication (2 ECTS)		Cultural understanding Internal and external communication (2 ECTS)	
Organization and SCM (8 ECTS)	Resources: Organizational structure and resources User involvement and innovation Innovative business models 3 (ECTS)	Project Management Personal Leadership Team work Project writing Presentation techniques Strategic Supply Chain Management Purchasing and distribution  (3 ECTS)	Trend analysis CSR and externalities in Supply Chain Management  (2 ECTS)
	J (LC13)	(3 LC13)	(2 [010)

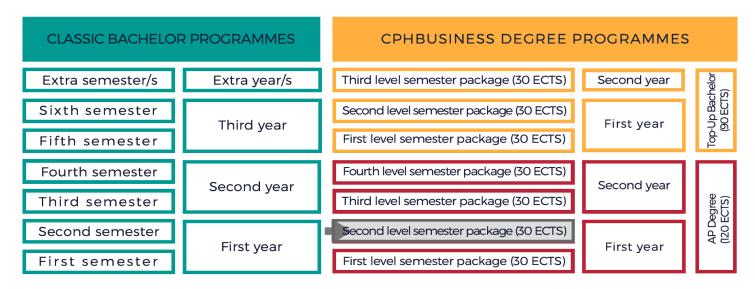

# S-MEC-2-E-18 (Marketing Management level 2 Søerne)

The courses of this semester package take place at Cphbusiness Søerne (Nansensgade 19, 1366 Copenhagen K) during the autumn semester 2018.

# 1. An illustration of the level of the semester package

The second semester of the AP Degree in Marketing Management is equivalent to the second semester of a classic Bachelor degree.

# 2. Admission requirements

# Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

### 3. Information about exams

An individual written case-exam will conclude the second semester, where the students get 24 hours' preparation on a specific business related problem, followed by a 6 hours' written exam.

This exam covers all subjects studied during the semester (described in the table below) and therefore all 30 ECTS of the semester package.

For general information about exams and grading scale, please check the relevant chapter.

# 4. Description of subjects

At Cphbusiness, we use different methods of teaching. The common denominator is that the students get to use the theories and models in a practical context. We do that by working with cases, exercises and projects that incorporate the tools in a real life situation.

As students advance from theme to theme (see the table below), new materials build on the lessons learned from previous themes and advance the student's competencies and knowledge by working with a multidisciplinary approach.

In order to ensure progress, a number of Obligatory Learning Activities (OLA) planned and conducted during the semester. The 5 OLA's per semester allow the students to deliver assignments and/or projects and receive feedback from their teachers, which help them reflect on their progress.

Organization and Supply Chain Management (2 ECTS)	Assortment Distribution Retail / E-commerce (1 ECTS)	Relationship types Supply Chain Management Choice of distribution, storagecontrol, form of establishment and partner management (1 ECTS)

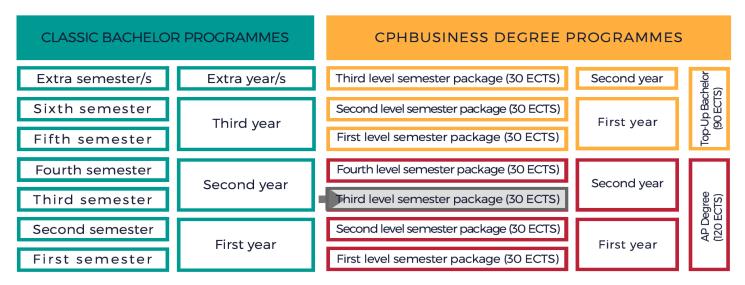

# S-MEC-3-E-18 (Marketing Management level 3 Søerne)

The courses of this semester package take place at Cphbusiness Søerne (Nansensgade 19, 1366 Copenhagen K) during the autumn semester 2018.

# 1. An illustration of the level of the semester package

The third semester Marketing Management is equivalent to the third semester of a classic Bachelor programme.

### 2. Admission requirements

# Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

# Academic requirements

Please note the courses of the third semester package Marketing Management require that you have basic knowledge of Marketing, Economics, Statistics, Supply Chain, and Organisation. In order to get an idea about what you need to know, please check the description of the first and second level semesters Marketing Management:

- First level: <u>S-MEC-1-E-18 (Marketing Management 1 Søerne)</u>
- Second level: S-MEC-2-E-18 (Marketing Management 2 Søerne)

### 3. Information about exams

Each module will be evaluated by an exam graded using the 7-point Grading Scale. Exam form depends on subject.

For general information about exams and grading scale, please check the relevant chapter.

# 4. Description of subjects and teaching

The third semester Marketing Management is divided in 3 periods of 6 weeks each. During the first period, students will cover the mandatory courses described in the table below. During the second and third periods, students will cover elective subjects. Students will receive an Elective Subjects Catalogue together with more information about registering for the relevant electives as soon as possible.

Teaching and group-work will start already from the first day and students must make sure they arrive in Copenhagen at least one or two working days before the start of the semester, in order to solve practical matters.

Each period ends with an exam.

Subject	ECTS
International Marketing (mandatory)	5
This course digs into the different strategies a company can employ for internationalisation (from an overv benefits and possible pitfalls of internationalisation to working in depth with market assessment and select choice of entry strategies.)	
International Economics (mandatory)	5
This course supports the marketing subject in providing tools for describing and assessing economic facto to the company's internationalization efforts, and goes further in determining the financial effects of invest markets.	ing in new
The criteria for selecting international markets are investigated using trade theories, exchange rate formati of inflation and employment as well as looking into the sources of financing internationalization.	on, causes
Elective subject (You will have to choose 4 from a list of offers. The final list will be sent to students separately. The list below can be used for inspiration. Please note changes may occur.)	(4x) 5
Examples of possible elective subjects.

# L-MEC-1-E-18 (Marketing Management level 1 Lyngby)

The courses of this semester package take place at Cphbusiness Lyngby (Nørgaardsvej 30, 2800 Kgs. Lyngby) during the autumn semester 2018.

# 1. An illustration of the level of the semester package

The first semester Marketing Management is equivalent to the first semester of a classic Bachelor programme.

# 2. Admission requirements

# Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

### 3. Information about exams

The first semester exam is one interdisciplinary exam covering all the subjects shown below. Students will be given a case mid-December and will be working on this in groups of 4-5 students. Mid-January they submit a video with the solution. At the end of January there is an oral group exam where the group can elaborate on the solution and will answer questions about the analysis. Individual grades will be given.

For general information about exams and grading scale, please check the relevant chapter.

# 4. Description of subjects and teaching

Classes at Cphbusiness Lyngby have a different structure than the ones at Cphbusiness Søerne.

The teaching is highly interdisciplinary and the students will not study the subjects in the classical way (e.g. Marketing, Business Law or Economics as separate disciplines).

Instead, the curriculum is divided into "theme modules" with different learning objectives. Each learning objective is achieved by learning and working with tools and theories across the traditional disciplines and sometimes across different programmes.

Although structured differently, the workload is similar to the description below.

Subject	ECTS
International Marketing	12
Economics	5
Business Law	2

Communication	5
Organization and Supply Chain Management	6

#### Theme modules of the first semester:

Module 1: Intro and customers - qualitative research

Module 2: Customers and market research - quantitative research

Module 3: External environment of the company

Module 4: Creating value in the company

Module 5: Analysis and methodology

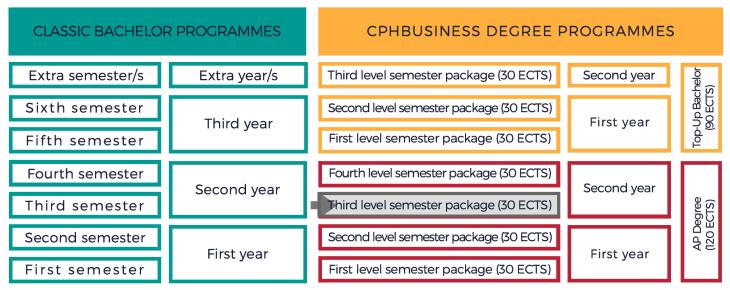

# L-MEC-3-E-18 (Marketing Management level 3 Lyngby)

The courses of this semester package take place at Cphbusiness Lyngby (Nørgaardsvej 30, 2800 Kgs. Lyngby) during the autumn semester 2018.

# 1. An illustration of the level of the semester package

The third semester Marketing Management is equivalent to the third semester of a classic Bachelor programme.

# 2. Admission requirements

# Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

# Academic requirements

Please note the courses of the third semester package Marketing Management require that **you have basic knowledge of Marketing, Economics, Statistics, Supply Chain, and Organisation**. In order to get an idea about what you need to know, please check the description of the first and second level semesters Marketing Management:

- First level: <u>S-MEC-1-E-18 (Marketing Management 1 Søerne)</u>
- Second level: S-MEC-2-E-18 (Marketing Management 2 Søerne)

### 3. Information about exams

Each module will be evaluated by an exam graded using the 7-point Grading Scale. Exam form depends on subject.

For general information about exams and grading scale, please check the relevant chapter,

# 4. Description of subjects and teaching

Classes at Cphbusiness Lyngby have a different structure than the ones at Cphbusiness Søerne.

The teaching is highly interdisciplinary and the students will not study the subjects in the classical way (e.g. Marketing, Business Law or Economics as separate disciplines).

Instead, the curriculum is divided into "theme modules" with different learning objectives. Each learning objective is achieved by learning and working with tools and theories across the traditional disciplines and sometimes across different programmes.

Although structured differently, the workload is similar to the description below.

Subject	ECTS
Global Marketing (mandatory)	5
This course digs into the different strategies a company can employ for internationalisation (frozenview of the benefits and possible pitfalls of internationalisation to working in depth with massessment and selection to choice of entry strategies.)	
Global Economics (mandatory)	5
This course supports the marketing subject in providing tools for describing and assessing eco factors relevant to the company's internationalization efforts, and goes further in determining effects of investing in new markets.	
The criteria for selecting international markets are investigated using trade theories, exchange formation, causes of inflation and employment as well as looking into the sources of financing internationalization.	rate

The students should be able to:

Handle new knowledge, skills and competences within services and experiences in an interdisciplinary cooperation as well as structure data collection as a basis for new solutions

#### Cooperation and Relations

10

#### Content:

The Cooperation & Relations subject area includes communication and management forms in an intercultural perspective, with focus on the interaction with the guest and the employee. Focus is on analysis and data material as the basis of developing internal and external communication in a national and international perspective.

### Learning objectives:

#### Knowledge

The students should have acquired knowledge of:

- Management within service and experience industries
- The applied practice concerning intercultural interaction and communication with the national as well as the international guest, customer, employee, volunteer, etc.

#### Skills

The students should be able to:

- Identify and assess managerial issues and set up suggested solutions
- Develop internal and external communication, digitally, in writing and orally to guests, customers, colleagues and business partners
- Apply knowledge of intercultural aspects in relations with the company's internal and external partners and stakeholders

### Competencies

The students should be able to:

- Take part in interdisciplinary cooperation with internal and external partners and stakeholders in an international environment
- Take part in the development of the professional communication

Acquire new knowledge, skills and competences concerning management and communication within the service and experience industry at a tactical and operational level

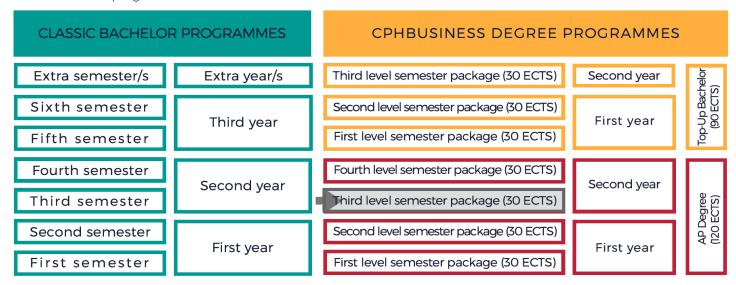

# **Courses in Financial Management and Services**

# C-FIB-3-E-18 (Financial Management and Services level 3 City)

The courses of the third level Bachelor Degree in Financial Management and Services take place at Cphbusiness City (Landemærket 11, 1119 København K) during the autumn semester 2018.

### 1. An illustration of the level of the semester

The third semester of the Bachelor Degree in Financial Management and Services is equivalent to the third semester of a classic Bachelor programme.

# 2. Admission requirements

### Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

### 3. Information about exams

The third semester ends with the "Third Internal Exam" and "Fourth Internal Exam" (Internal censorship)

#### Third internal exam:

Subjects: Macro economy, Statistics and International Capital Markets. The Exam is a 60 min. oral group Exam based on preliminary teamwork in groups.

### Fourth Internal Exam:

Subjects: Culture, Organization and Marketing. The Exam is a 20 min. individual oral exam, based on preliminary teamwork in groups.

Both Exams will be graded according to the 7-point grading scale. Further info will be offered by the end of the semester.

For general information about exams and grading scale, please check the relevant chapter.

### 4. Description of subjects and teaching

Teaching is in English. Cphbusiness expect that the students complete the mandatory tasks and individual learning activities. The lectures will be arranged as classroom teaching with an expected participation of 25-35 students in the

classroom. Individual speech and performance will be a big part of the teaching and learning process. The ability to work in groups is essential for the participation in the semester.

The classes on  $3^{rd}$  semester are running on a daily basis, starting at 08:15 until 16:15. There is a lunchbreak between 12:00 and 12:30. The students' workload is approximately 40 hours per week + mandatory tasks.

A day combines group-work, self-study and teaching by a lecturer. Events can be expected, with several classes on same semester, in an Auditorium plenum. A schedule for the entire semester is available on the Learning Management System, (Moodle) before semester start.

The 3<sup>rd</sup> semester of the Bachelor Programme in Financial Management and Services, runs only in the Autumn/Fall semester, from 29 August (2017) and ends with exams in January 2018.

BAK JAN 2017

# **Courses in Innovation and Entrepreneurship**

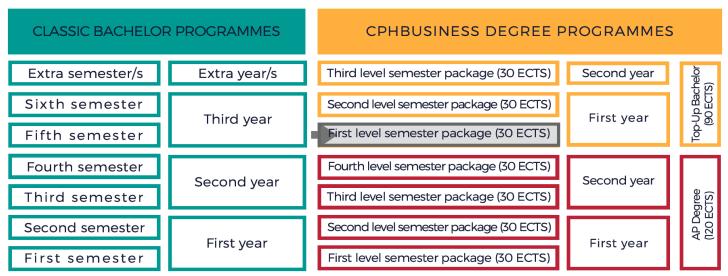

# ! Updated - \*L-INE-1-E-18 (Innovation and Entrepreneurship level 1 Lyngby)

!!! Please note the description below is the updated version - according to the new curriculum.

The first level courses take place at Cphbusiness Lyngby (Nørgaardsvej 30, 2800 Kgs. Lyngby) during the autumn semester 2018.

### 1. An illustration of the level of the semester

The first semester Top-Up Bachelor Degree in Innovation and Entrepreneurship is equivalent to the fifth semester of a classical Bachelor programme.

# 2. Admission requirements

### Academic requirements

### BEFORE YOU APPLY FOR THIS SEMESTER PACKAGE

MAKE SURE YOU HAVE THE FOLLOWING:

At least 2-3 years (120 ECTS) of undergraduate studies e.g. within the fields of design, finance, graphics, computer science, marketing or service

### Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

### 3. Practical information

Places on our top-up bachelor programmes are limited. Students who apply for a semester on a top-up bachelor programme will be required to send extra documentation to prove they fulfil the above-mentioned criteria. Only students with the relevant background and highest grades will be admitted.

Make sure your second option is a semester package at AP Degree level and that both your options are approved by your home institution before applying.

### 4. Information about exams

A multiple-choice exam will be organized for Entrepreneurship. The grade (7-Point Grading Scale) will count for 50% of the final grade calculated for the semester.

The other subjects will be evaluated through a group project and an oral group exam. A grade on the 7-Point Grading Scale will be awarded, accounting for the other 50% of the final grade.

Students must receive passing grades in both exams, in order to pass the semester.

For general information about exams and grading scale, please check the relevant chapter.

# 5. Description of subjects and teaching

### Entrepreneurship - 10 ECTS

#### Contents:

This programme element covers both entrepreneurship and intrapreneurship, including testing and validation of concept and business models in relation to product development, marketing and go-to-market.

### Learning Objectives:

#### Knowledge

The student must have:

- development-based knowledge of the subject area's practices and applied theory and methodology, including
  various approaches to entrepreneurship and intrapreneurship, and the ability to reflect on their relevance and
  applicability
- knowledge of and the ability to reflect on different approaches to the importance of the outside world for entrepreneurship
- knowledge of the challenges of and tools for starting and running a business as well as the ability to reflect on these.

#### Skills

The student must be able to:

- use intrapreneurial and entrepreneurial methods and tools and reflect on their relevance and applicability in relation to the development, establishment and operation of sustainable concepts
- evaluate practice-oriented and theoretical issues relating to intrapreneurship and entrepreneurship as well as choosing and explaining relevant solution models
- communicate practice-oriented and academic issues relating to intrapreneurship and entrepreneurship and solutions to partners and stakeholders.

### Competencies

The student must be able to:

- handle complex and development-oriented situations related to starting new projects, organisations and businesses
- identify personal learning needs and develop own knowledge, skills and competencies within the field of intrapreneurship and entrepreneurship.

### Management - 10 ECTS

### Content:

This programme element covers management at the individual level, including self-management and personal development, as well as other forms of management, including project management, change management, innovation management and the development and management of teams in new or existing businesses.

#### Learning objectives:

### Knowledge

The student must have:

- development-based knowledge of the subject area's practices and applied theory and methodology in relation to management and network structures
- an understanding of the practices, theory and methodology applied in management, including personal, team, project and innovation management, and the ability to reflect on the applicability of these.

#### Skills

The student must be able to:

- apply the methods and tools of the subject area and master the skills related to employment in terms of the management field, including situation analyses in organisations undergoing change
- evaluate practice-oriented and theoretical issues as well as choosing and explaining relevant solution models within team, project, innovation and change management
- establish networks and build relevant relationships
- communicate practice-oriented and academic issues and solutions related to management initiatives and actions in specific contexts to partners and users, as well as building up and participating in relevant relations and networks.

### Competencies

The student must be able to:

- handle complex and development-oriented management tasks and challenges in concrete work situations, including personal management, team management, project management and change management in businesses and organisations
- independently enter into specialised and interdisciplinary collaboration within the field of management and assume responsibility within the framework of professional management ethics
- identify personal learning needs and develop own knowledge, skills and competencies related to the profession in terms of management.

#### Innovation - 10 ECTS

#### Content:

This programme element includes ideation, creative and innovative processes and concept development regarding the development of sustainable products, concepts, processes etc. in new or existing businesses.

### Learning objectives:

#### Knowledge

The student must have:

- development-based knowledge of various types and perceptions of innovation and the ability to reflect on their relevance
- knowledge and understanding of practices and applied theory and methodology in relation to the development of sustainable business models, designs, products/concepts and processes, from problem identification to ideation and finally validation and implementation
- knowledge of the different approaches and methods for generating and applying knowledge and insights, including collecting, processing, analysing and validating data, and the ability to reflect on the applicability thereof.

#### Skills

The student must be able to:

- apply the methods and tools of the subject area and master the skills related to working with innovation, including methods for testing ideas, concepts, products etc. as well as creative and innovative processes
- evaluate practice-oriented and theoretical issues relating to innovation as well as choosing and explaining relevant solution models in relation to the relevance and sustainability of personal and peer ideas, concepts, processes and products
- communicate practice-oriented and academic issues, innovative processes and products to stakeholders.

#### Competencies

The student must be able to:

- develop and drive innovation processes in practice, from problem identification to ideation and finally to the validation and implementation of a sustainable product, design, concept or process in new or existing businesses and organisations
- independently enter into specialised and interdisciplinary collaboration within the field of innovation and assume responsibility within the framework of professional ethics
- identify personal learning needs and develop own knowledge, skills and competencies within the field of innovation.

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

# 3. Practical information

Places on our top-up bachelor programmes are limited. Students who apply for a semester on a top-up bachelor programme will be required to send extra documentation to prove they fulfil the above-mentioned criteria. Only students with the relevant background and highest grades will be admitted.

Make sure your second option is a semester package at AP Degree level and that both your options are approved by your home institution before applying.

### 4. Information about exams

One interdisciplinary exam will be organized at the end of the semester covering subjects described below. One grade will be awarded according to the 7-point grading scale.

For general information about exams and grading scale, please check the relevant chapter.

# 5. Distribution of subjects:

	International Marketing and Sales	Organisation, Management, Supply Chain	Economics	Law	Methodology	Total ECTS
Theme 1: The Company's Strategic Basis (Business Model)	2,5	2,0	2,0	1,0	2,5	10
Theme 2: The Customer as the Starting Point	9,0	3,5	3,0	3,0	1,5	20
Total ECTS	11,5	5,5	5	4	4	30

# 6. Detailed description of the course elements:

Course element contents:	ECTS
The Company's Strategic Basis (Business Model)	10

#### Content:

The subject element includes strategic analyses of companies, including strategic directions and business models for B2C, B2B and B2G, and analyses of the company's resources and competencies, including in relation to the company's innovative platform, processes and driving forces. The analyses also incorporate the company's economic and financial foundation, cost perceptions, capacity utilisation and product mix optimisation.

The subject element covers an understanding of the supply chain/SCM and the geographical location of production and competence centres, including choices for distribution channels, partnerships and outsourcing. The subject element also covers various legal aspects, including sources of law, international private law, types of conflict resolution and distribution forms.

The subject element also includes a review of the scientific theory paradigms and perspectives on knowledge, insight and knowledge recognition.

### Learning objectives:

#### Knowledge

### The student must:

- Have knowledge of different types of business models and of models and theories used to understand a company's strategic base
- Have knowledge about different strategic directions related to the concept of innovation
- Have knowledge of disruption as a concept and development direction
- Have knowledge and understanding of relevant theories and models to analyse the company's strategic platform, including resources and competences
- Have knowledge and understanding of theories about the company's innovative platform, creative processes and management
- Have knowledge of the elements of a company's supply chain (both functional and innovative products)
- Have knowledge of theories and models to assess insourcing and outsourcing
- Have knowledge and understanding of relevant economic models and theories in relation to the business model
- Have knowledge of localization analysis and distribution strategy (both digital and physical omni-channel)
- Have knowledge and understanding of relevant economic models in relation to business models
- · Have knowledge of important perspectives on knowledge, insight and cognition
- Have knowledge and understanding of key paradigm shifts in business economics
- Have a solid understanding of what knowledge is in a sociological sense and be aware of the role of knowledge in a business economics perspective
- Have a basic knowledge of major theoretical issues and schools within a social science perspective and particularly in the core areas of marketing, organisation/management and economics
- Have knowledge of international sources of law and their mutual relations as well as relations with national legal sources
- Have knowledge of international dispute resolution

#### Skills

### The student must:

- Be able to apply and discuss the different strategic directions
- Be able to use disruption and innovation to challenge a company's existing business model
- Be able to analyse and evaluate the company's strategic and innovative platform and development opportunities
- Be able to assess the impact of a company's site selection and form of distribution/channel
- Be able to assess the consequences of the choice of external partners
- Be able to assess the company's economic and financial base using relevant indicators
- Be able to carry out an economic analysis, assessment and prioritisation of product mixes in different cost models
- Be able to critically apply empirical-analytical theory and discuss what knowledge is, how it is generated and how it interacts with practice
- Be able to communicate theoretical issues and consequences to peers
- Be able to assess theoretical and practical issues in relation to the philosophy of science
- Be able to apply rules of applicable law and jurisdiction in international sales and assess the consequences of the choices made
- Be able to apply the rules of the different distribution forms in an analysis and assessment of the choice of distribution form

#### Competencies

#### The student can:

- Independently participate in interdisciplinary cooperation in order to assess a company's strategic position
- Make recommendations for the optimization of a company's business model
- Work with innovation in all phases of the business model
- Participate in the multidisciplinary development of a company's innovative foundation
- Identify elements of value creation in the supply chain
- Develop economic decision making options related to corporate strategy, business cases, cost and price structure
- Discuss different epistemological paradigms
- Discuss hypotheses in relation to different epistemological paradigms

Discuss the consequences of the epistemological choice

### The Customer as the Starting Point

20

#### Content:

The subject element covers analyses of current and potential customers, including their strategic situation, needs and wishes. These analyses provide the basis for developing the company's strategies and market offerings for existing and potential customers. In this connection, the element covers work on the development and retention of the customer base through relationship strategies.

The subject element also covers analyses of the company's sales organisation in relation to the sales team and purchase centre, including relations to other corporate functions and business partners. It also covers work with international strategies for the company's supply chain and logistic support for sales, and the integration of various sales channels – omni-channel, digital and physical. Strategies are based on an analysis of the company's financial situation, including product and customer mix, economic customer life cycle analyses and the legal context, including international purchasing and contract law, transport law and public procurement law.

The subject element's analyses and strategies are based on the students' ability to combine commercial theory with methodology in scientific projects.

### Learning objectives:

### Knowledge

#### The student must:

- Have knowledge and understanding of relevant theories and models to analyse a company's competencies, customer base and development of a customer portfolio including profitability reports
- Have knowledge and understanding of the company's market opportunities and possible marketing strategies
- Have knowledge of general strategic approaches and models in structuring and organising sales
- Have knowledge and understanding of implementability and its relationship to other departments and partners, including competence assessment and communication structure
- Understand important implications for the company's logistics and supply chain of internationalization and innovative projects
- Be able to understand the theoretical tools in relation to the company's supply chain for the development of international sales bases - strategic, tactical and operational
- Have knowledge and understanding of tools and methods for the assessment of customer and product
  portfolios in relation to profitability, as well as alternative methods for profitability calculations
- Have gained an understanding of the application of methodology in project and report writing following the principles of scholarly work

- Have knowledge about how to collect, interpret and analyse data
- Have knowledge of the general principles of EU procurement rules for sales to public authorities

#### Skills

#### The student must:

- Be able to analyse and evaluate both the overall customer base and the individual customers in relation to the company's value proposition using methods and tools for analysing customer behaviour, including the use of big data and profitability reports
- Be able to carry out an assessment of customers profitability and future earnings potential and evaluate the relevance of a resource-based approach or a market approach
- Be able to develop the company's marketing strategies
- Starting from the customer, be able to analyse and assess the organization of the sale, including relationships with other business functions
- Be able to analyse and assess skill needs in the sales function in relation to customer requirements
- Be able to analyse and assess an internationally focused company's choice of supply chain with the involvement of relevant theory in the field
- Be able to analyse and organize the company's supply chain in relation to the sales organization and development of partnerships with a focus on ensuring customer satisfaction and quality of experience
- Be able to apply relevant models for the development of solutions for the company's supply chain in innovative projects
- Be able to evaluate and use methods and tools for the company's supply chain to support the tactical and
  operational sales
- Be able to calculate and assess the profitability of alternative cost allocation methods: Activity-Based Costing and traditional standard cost
- Be able to identify relevant total life cycle costs (TLCC)
- Be able to reflect on and engage in discussion about business financial perspectives in scientific contexts
- Be able to develop problem analysis and perform problem definition and put forward problems and hypotheses
- Be able to assess and select ideal survey forms for a given issue and compare critically to the survey forms used
  in practice
- Have knowledge of the transportation contract in maritime and road transport, with particular emphasis on carrier liability

### Competencies

### The student can:

- Independently participate in multidisciplinary teams in relation to the company's marketing intelligence, with customers as a starting point
- Select relevant data for analysis of the company's customer care and customer development structure
- Enter into a discussion about the company's ability to match the sales function to customer expectations
- Identify challenges in the company's supply chain in innovative projects
- Ensure the involvement of the company's supply chain in developing the sales strategy
- Prepare a reasoned decision presentation on the basis of alternative cost allocation models
- Evaluate a customer profitability portfolio and expected future earnings potential
- Critically assess opportunities and constraints related to quantitative and qualitative data
- Collect, process and interpret quantitative and qualitative data and relate it critically to existing or new data material, including knowledge of measurement scales and being able to judge the relevance, timeliness, validity, reliability and generalizability
- Prepare scientific reports and projects, including disseminating findings and solutions etc. in a clear and easily readable report containing a clear problem definition, methodology considerations and an evaluation of findings and prerequisites, reliability and validity
  - o Independently participate in professional and interdisciplinary cooperation on the conclusion of international sales agreements, with special emphasis on: CISG (International contracts and the international sale); Terms and conditions; INCOTERMS
- Securing the purchase price

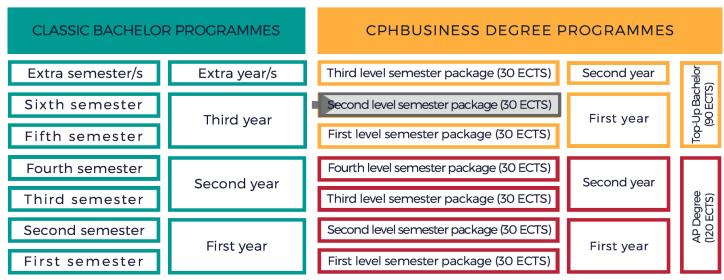

# \*S-INS-2-E-18 (International Sales and Marketing level 2 Søerne)

The courses of this semester package take place at Cphbusiness Søerne (Nansensgade 19, 1366 Copenhagen K) during the autumn semester 2018.

# 1. An illustration of the level of the semester package

The second semester of the Top-Up Bachelor in International Sales and Marketing is equivalent to the sixth semester of a classic Bachelor programme.

# 2. Admission requirements

# Academic requirements

# BEFORE YOU APPLY FOR THIS SEMESTER PACKAGE

MAKE SURE YOU HAVE THE FOLLOWING:

At least 2 years (the equivalent of an AP Degree (120 ECTS)) of undergraduate studies within Marketing, Economics and Management, Organisation, Supply Chain Management and Logistics, including:

- Marketing 20 ECTS
- Management, Organisation, Supply Chain Management, Logistics 10 ECTS
- Economics 15 ECTS

# Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

## 3. Practical information

Places on our top-up programmes are limited. Students who apply for a semester on a top-up programme will be required to send extra documentation to prove they fulfil the above-mentioned criteria. Only students with the relevant background and highest grades will be admitted.

Make sure your second option is a semester package at AP Degree level and that both your options are approved by your home institution before applying.

### 4. Information about exams

Theme 3 and Theme 4 will be evaluated with the help of two exams. Each exam will be graded on the 7-point grading scale and an overall grade will be calculated to cover both themes.

Elective subjects will also conclude with an exam each and an overall grade (7-point grading scale) will be calculated as above.

For general information about exams and grading scale, please check the relevant chapter.

# 5. Distribution of subjects:

	International Marketing and Sales	Organisation, Management, Supply Chain	Economics	Law	Methodology	Elective subject	Total ECTS
Theme 3: Industry and Competitors	2,0	1,0	1,0	0,5	0,5	0	5
Theme 4: Sales Management and the Sales Development of the Company	4,0	3,5	1,5	0,5	0,5	0	10
Elective subject	0	0	0	0	0	15	15
Total	6	4,5	2,5	1	1	15	30

# 6. Detailed description of the course elements:

### **OBLIGATORY SUBJECTS**

Contents	ECTS
Industry and Competitors	5

### Content:

The subject element covers analyses of competition, competitors and cluster and network collaboration, whereby the company can benchmark in relation to the supply chain, social responsibility and sustainability, including CSR, and the international economic environment, and seen in relation to competition law. The subject element also requires a methodical approach to acquiring knowledge based on the theoretical standpoint.

### Learning objectives:

### Knowledge

The student must:

- Have knowledge of relevant theories and models about competitive positions in the market and how these are implemented
- Have knowledge about different benchmarking models
- Have knowledge of CSR, social responsibility and sustainability
- Have knowledge about basic benchmarking theory and models in SCM
- Have knowledge of financial and non-financial benchmarking
- Have an understanding of international macroeconomic industry environment influences
- Have knowledge of the theory of science, theoretical assumptions and methodological approaches that support the generation of knowledge
- Have knowledge of Danish and European competition law and the interaction between the rules

### Skills

### The student must:

- Be able to analyse and evaluate a company's competitive position as a basis for development and adaptation of the company's market offerings. In relation to this, be able to benchmark a company in relation to an industry and to the company's closest competitors, including strategies
- Be able to analyse the company's social dimension in relation to the company's strategic position.
- Be able to apply relevant theories and models in connection with benchmarking of an international company's supply chain

- Be able to assess international macroeconomic factors that may affect the competitive situation in the industry for a given company
- Be able to assess the risks of international commerce
- Be able to benchmark a company against a competitor or industry and
- Be able to make an assessment of identified international economic conditions in the external environment and assess the impact of such an industry and company
- Collect, process and interpret quantitative and qualitative data and relate it critically to existing or new data
  material, including knowledge of measurement scales and being able to judge the relevance, timeliness, validity,
  reliability and generalizability

### Competencies

#### The student can:

- Participate in the company's marketing intelligence with a focus on design and analysis of information about competitive position in the market
- Identify and analyse the specific competitors
- Identify a company's main CSR challenges
- Identify areas for improvement in the company's supply chain, based on benchmarking
- · Identify and manage risk and hedging in connection with international trade
- The student has gained experience in the scientific method's limitations

### Sales Management and the Sales Development of the Company

10

#### Content:

The subject element covers insight into the development of international sales strategies, including online and offline strategies, CRM for new and existing customers, customer follow-up, and key account and global account management.

The subject element also covers insight into organisational development and change management, taking into account employment law, and measuring efficiency and risk assessment for the company's supply chain. The subject element covers budgeting, balanced scorecard and the triple bottom line in the selection of strategies for the company. The subject element also requires students to incorporate and reflect on the significance of the theoretical standpoint for projects.

### Learning objectives:

#### Knowledge

### The student must:

- Understand and be able to reflect on key theories for the development of the company's sales base using different approaches
- Have knowledge of models and methods for customer follow-up
- Have knowledge and understanding of relevant theories and models related to business models, where sales are
  the starting point
- Have knowledge and understanding of the organizational consequences of growth
- Have knowledge of the management theories which may support the development of the company's sales base
- Have knowledge about different theories on motivation and incentive strategies
- Have knowledge and understanding of different types of conflict and conflict resolution options
- Have knowledge of situational leadership
- Have knowledge of the criteria for the evaluation of the sales department's efforts
- Have knowledge of tools for measuring the effectiveness of a company's supply chain
- Have knowledge of methods and models for risk assessment of the supply chain
- Understand alternative budget models
- Have knowledge of alternative financial and non-financial reporting forms, including understanding frameworks and legislation related to the company's economic, environmental and social reporting
- Be able to assess the epistemological and methodological issues and integrate an understanding of academic work and methods with professionalism in project and report writing

### Skills

### The student must:

- Be able to analyse, develop and implement international sales strategies for different business types (industry, sizes, resources etc.).
- Be able to develop and adapt a company's marketing mix for individual clients
- Be able to justify and communicate selected strategies in a sales plan to relevant stakeholders
- Be able to evaluate the activities linked to the company's general marketing mix for customers, and for individual customers, and be able to propose possible changes in strategy and approach
- Be able to develop a plan for the organizations development and assess the impacts when compared with the organizations complexity
- Be able to assess the development of the sales organization
- Be able to assess the competency requirements for the sales team
- Be able to develop strategies for motivation and coaching of the sales staff
- Be able to identify their own learning needs, so that knowledge and skills are developed

- Be able to be included in the evaluation of employees personal, professional, cultural and social skills
- Be able to develop a follow-up plan for the company's business model in relation to measuring the effectiveness
  of a company's supply chain
- Be able to prepare budget assumptions and prepare and evaluate a total budget for strategic decisions and assess their economic impact
- Be able to make reflections on their own practice
- Be able to make reflections on the scientific methods limitations
- Be able to apply rules of employment in an international context, including compliance with the rules on jurisdiction and applicable law, with special emphasis on recruitment and retention, relocation and dismissal

#### Competencies

#### The student can:

- Manage and lead the development of sales strategies in complex situations and based on the involvement of relevant stakeholders
- Work with assessments of the company's overall activities for customers
- Work with a holistic approach on the development of the company's strategic base
- Identify their own learning needs in order to develop and maintain appropriate skills to work from a holistic approach
- Independently analyse and participate in the development of an organizational plan of action to ensure implementation of the sales plan
- Independently participate within and across disciplines in organizational development
- Enter into dialogue with the sales department about optimization of the company's total sales efforts from the perspective of efficiency throughout the supply chain
- Establish a basis for decisions regarding the company's strategy implementation

### **ELECTIVE SUBJECTS**

Students will choose one of the below. Each elective subject has a workload of 10 ECTS.

### PROJECT MANAGEMENT AND PROJECT SALES

### Purpose & Learning Outcome:

### Objectives and contents:

- A general understanding of projects and project sales in a strategic perspective, and how to manage them.
- An in-depth understanding of a business case, both at seller and buyer
- Experience in using theories, models, tools and methods for project sales and management of projects in a professional context
- Understanding the differences in project sales in B2B and B2G.
- Understanding project management in B2C, B2B and B2G.

The topic has two equal foundations: project sales and project management. Please see detailed description of the subjects below.

### Project Sales:

# Knowledge:

The student should have acquired knowledge about:

- How to define project sales
- Defining and describing the sellers' role within project sales (consultant vs seller)
- Market segmentation of strategic customers and the competitive environment
- Identification of strategic customers and projects
- Identification of customer buying criteria
- The decision process and buying behavior of the customer (identification of stake holders and value chain)
- The process of project sales ("capture planning" within strategic scope of the company)
- Preparation, planning, execution & follow-up of sales meetings
- Requirement to quotations, requirements for public tenders ("the winning proposal")
- Business Case development (both seller's perspective and customer's perspective)
- Cost calculations and price settings of sales projects
- Requirements to project team
- Closing and follow-up on projects

#### Skills:

The student should be able to:

- Define and build a business case
- Understand and define risk elements
- Analyze the stakeholders of a project (both internally at seller and at customer)
- Communicate to project groups
- Produce offers in a formal way, meeting requirements
- Understand the strategic positioning at the customer
- Act as consultant in the seller role

### Competences:

The student should have obtained competences in regards to:

- Plan professional project sales by using relevant tools and methods
- Implement project sales and adjusting the sales/customer process continuously

### Project management:

### Knowledge:

The student should have acquired knowledge about:

- How to define a project and what parameters the project manager can adjust
- Project portfolio management in a company strategic perspective
- How to define the work streams, deliverables, milestones and activities of a project (Stage-Gate and SCRUM)
- How to plan a project by using tools such as a Gantt Chart and the Work Break Down Schedule
- How to define the stakeholders of a project and how to handle their influence by communication
- The role of the project manager and the different roles in a project organization, including the roles of the project team and the steering committee
- The risks in relation to implementation of a project and how to handle it
- Different forms of meetings and their purpose
- The business case and budget of a project

### Skills:

The student should be able to:

- To illustrate the purpose and objective of a project by preparing an Objective Break-Down Schedule
- To plan a project by defining work streams, deliverables, milestones and activities in a Work Break Down Schedule and a Gantt Chart
- To do a risk analysis
- To analyze the stakeholders of a project and make a communication plan
- To plan the relevant meetings throughout the implementation of the project
- To make a budget or business case for a project

#### Competences:

The student should have obtained competences in regards to:

- Plan a project in a professional context by using relevant tools and methods
- Implement a project and adjusting the plan continuously

#### Content and milestones

### Content:

Lesson	Content
Lesson 1	The project concept (PM)
	Customer profitability/Buying criteria (PS)
Lesson 2	Success with projects (PM)
	Setting the joint transformation agenda with the strategic customer (PS)
Lesson 3	Planning the project (PM)
	Integrated value chains & guiding customer business transformation (PS)
Lesson 4	Context and types of projects (PM)
	Key Account Management (PS)
Lesson 5	Portfolio management (PM)
	Sales leadership in projects - undertaking the transformative journey (PS)

#### Milestones:

- Group formation/Abstract for the group work
- Preliminary problem formulation for individual work
- Update individual problem
- Hand in of group work
- Hand in of individual work

#### **Evaluation Criteria**

The evaluation criteria of the four mandatory elements that are graded are as follows:

Element	Evaluation criteria
A: Written Element, Part 1:	Theoretical knowledge demonstrated
The Group Report (25%)	Relevance of data
	Written presentation
B: Written Element, Part 2:	Written presentation
An individual article or	Theoretical knowledge demonstrated
creative product (25%)	Relevance of data or creative content
C: Oral Element, Part 1:	Structure and content of presentation
Group presentation to an	Presentation skills
audience (10%)	
D: Oral Element, Part 2:	Ability to demonstrate knowledge of international project management
Individual oral exam (40%)	Presentation skills

#### Feedback

Verbal feedback will be provided:

- after each milestone
- after the group presentation (no grade)
- after the individual oral exam (including a weighted grade for the entire course)

### Tentative Literature (on Project Sales)

- 1) P.Kotler, M Dingena & W.Pfoertsch, Transformational Sales
- 2) Articles TBD

### Tentative Literature (on Project Management)

# (ONLY IN DANISH) EU LAW AND BIG DATA

We have combined the two topics EU law and Big Data justified by the increasing level of internationalization and digitalization in the society.

We see EU law as an important part of our daily life and at the same time a digital approach to business and personal life all over the place in the future digital world.

The ECTS points are divided as follows: 10 ECTS for Law and 5 ECTS for Big Data.

### 1. Purpose of the course and learning objectives

#### Purpose.

The students will get knowledge, skills and competences about the European Union, the EU law, and the digital society that influences us all every day.

To be serious and professional in business life today, the students must understand the fact, that EU law and judgments from the EU-Court have a significant influence on EU citizens and companies.

The student will get knowledge, skills ad competences about Big Data in general and the implications for Law specifically. In a digital and data driven world it is crucial to be knowledgeable about the impact from the way we create documentation, i.e. digital foot print in our private and professional lives.

#### Learning objectives

### Knowledge:

- The student will get general knowledge about EU and the Treaty of Lisbon.
- The student will get knowledge about the EU sources of law
- The student will get knowledge of the EU institutions and the democratic systems.
- The student will get knowledge of the legal principles in EU law and the relationship to national courts.
- The student will get knowledge about theories and models and basic ideas of big data the business value approach.
- The student will get knowledge about working with data in a legal context.

### Skills:

- The student will get skills to understand the important rights for free movement of goods, persons, services and the right to establish a business inside the Internal Market based on the Treaty of Lisbon.
- The student will get skills to understand how to analyse data to provide information from an ethical and law perspective

#### Competences:

- The students will learn how to seek relevant EU legislation and information and how to read, discuss and understand EU Court judgments.
- The students should be able to solve concrete legal EU cases
- The students should be able to take part in discussions in class about what is happening right now inside the EU e.g. Brexit.
- The student will be able to evaluate data for monitoring the exchange of information as input in a law context

### 2. Content and milestones

# Content:

- EU law including the Treaty of Lisbon
- The rules about the free movement and the prohibition against discriminations and restrictions.
- Search of legal information in the EU
- Case stories e.g. Brexit, Europol or Frontex, Spain vs Google and others
- Coursera course "Ethics and Law in Data and Analytics"
- Workshop about Big Data in a legal context.

### Milestones

- 1. Online Course
- Individual written assignment about EU in general
- 3. Workshop about Big Data
- 4. Problem formulation for the group work
- 5. Status updates with tutors

#### Week

Topic/Method	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
Class room	X	X				
Online training	X	X				
Workshop		X				
Written Workshop assignment			Χ			
Problem formulation		X	X	X		
Group work			X	X	X	
Group presentation					X	
Individual exam						X

### 3. Teaching form

- Teaching in class
- Written individual assignments to practice
- Groupwork
- Workshops
- Online course

### 4. Evaluation criteria

### Big Data component - 5 ECTS

Element	Evaluation criteria
A. An online learning assignment - individual & group. (50%)	all assessments done and achieved
B. Written element. Workshop/Group	structure and content of the paper
written assignment max 2 pages per group member (50%)	discussion and understanding of the new dilemmas involved in evaluate data for monitoring the exchange of information as input in a law context

### EU Law component - 10 ECTS

Element	Evaluation criteria
C. Written assignment, group rapport	the theoretical knowledge
(50%)	relevance of data
(30%)	written presentation
	ability to demonstrate a good knowledge of EU law and the content of the
D. Oral element: Individual oral exam	group report.
(50 %)	presentation skills

### 5. Feedback

Verbal feedback will be provided:

- after milestones
- after the group presentation to an audience (no grade)
- after the individual exam including a weighted grade for the entire course

### 6. Literature/course material

Voluntary literature: Henrik Kure: EU-ret kompendium (Danish only)

https://www.mooc-list.com/course/ethics-and-law-analytics-and-ai-edx

When you sign up without certificate, it is free of charge: OBS that you only have one go at the assessments.

Articles and material from various databases

# PURCHASING, NEGOTIATION AND BIG DATA

## Objectives and contents:

General understanding of the role in a company as well as of the practical implementation, including negotiation at all levels:

- In-depth understanding of the purchasing process
- Ability to apply common theories within the subject area in order to solve practical issues inspired by real life
- Understanding for the specific issues related to purchasing in the public sector
- Understanding project management in B2C, B2B and B2G
- Ability to build information based on data and provide input for the negotiation process and the SLA this is based upon.

### Learning outcome:

The topic has three equal foundations: purchasing, negotiation and big data. Please see a description of all three elements below.

Literature: Articles and books.

### Content:

- Lectures
- Guest lecturers
- Group work with data
- Group work based on Cases
- Negotiation simulations

#### Milestones:

- 1: Preparing and participating in a negotiation case
- 2: Group exam
- 3: Preliminary problem statement for the individual assignment
- 4: Status update (individual work) to be discussed with tutoring voting.

### Exam and Evaluation Criteria:

### 5 ECTS ELECTIVE EXAM (Big Data)

Element	Evaluation criteria
Written Element: The	Theoretical knowledge demonstrated
Group Report (50%)	Relevance of data
Group Report (30%)	Written presentation
Oral Element: Group	Structure and content of presentation
presentation to an	Presentation skills
audience (50%)	

### 10 ECTS ELECTIVE EXAM (Purchasing and Negotiation)

Element	Evaluation criteria
Written Element: An	Written presentation
individual article or	Theoretical knowledge demonstrated
creative product (50%)	Relevance of data or creative content
Oral Element: Individual	Ability to demonstrate a good knowledge of international economics
oral exam (50%)	Presentation skills

### **Purchasing**

### Knowledge:

The student will have achieved knowledge about the following:

- The different steps in the purchasing process
- Developing purchasing strategies per product or product area
- Writing/building requirement specifications
- Competition theory and market forms
- Supplier search and supplier selection
- EU procurement rules
- Relations between buyer and supplier
- Power distance
- Calculation of net purchase price and long term costs (TCA and TCO)
- Contract management
- Use of IT in the purchasing process, including knowledge about specific tools

### Skills:

The student will be able to:

- Collect and evaluate requirements in a given purchasing situation
- Excecute a requirements specification which can form the basis for obtaining offers
- Compare and evaluate offers
- Develop processes for the daily trade
- Follow-up on deliveries
- Perform ongoing evaluation of the selected suppliers' performance
- Initialize renegotiation of existing contracts

#### Competencies:

The student will obtain the following competencies:

- Plan implementation of purchasing by using relevant tools, theories and methods
- Evaluate suppliers and their performance with the purpose of optimizing the purchase and the purchasing process

#### Negotiation

Knowledge:

The student will have achieved knowledge about the following:

- Phases and steps in the negotiation process
- Own negotiation profile
- Negotiation strategy and tactics
- Planning and preparing
- Questioning techniques

#### Skills:

The student will be able to:

Set goals for the negotiation results

- Choose a strategy by choosing relevant models and theories, for example the Kraljic model
- Analyze the supplier's negotiation profile
- Analyze the supplier's negotiation strength
- Controlling the negotiation process
- Complete the negotiation process

#### Competencies:

The student will obtain the following competencies:

- Ability to plan and execute a negotiation process by applying relevant tools, theories and models
- Ability to communicate efficiently during the negotiation process
- Ability to reflect upon the progress of the negotiation process

#### Big Data

#### Knowledge:

The student will have achieved knowledge about the following:

- Theories and models and basic ideas of big data the business value approach
- The role of big data in BtB buyer and supplier relations ships
- Providing data for monitoring the purchasing
- Providing data monitoring quality and performance
- Providing data to be used as input for the negotiation process

#### Skills:

The student will be able to:

- Analyze data to provide business information
- Analyze big data to draw key patterns
- Evaluate big data to provide input to purchasing negotiation
- Analyze big data with IBM Watson Analytical tools
- Build presentations based on data

#### Competencies:

The student will obtain the following competencies:

- Plan and evaluate the role of big data in BtB buyer and supplier relations ships
- Evaluate data for monitoring the purchasing
- Evaluate data monitoring quality and performance
- Evaluate data to be used as input for the negotiation process

# **Courses in Sport Management**

#### !\*L-SPM-1-E-18 (Sport Management level 1 Lyngby)

!!! Please note a new curriculum for the Top-Up Bachelor Degree in Sport Management is under development. The new curriculum will be used already from autumn 2018, which means changes will occur in the semester description below.

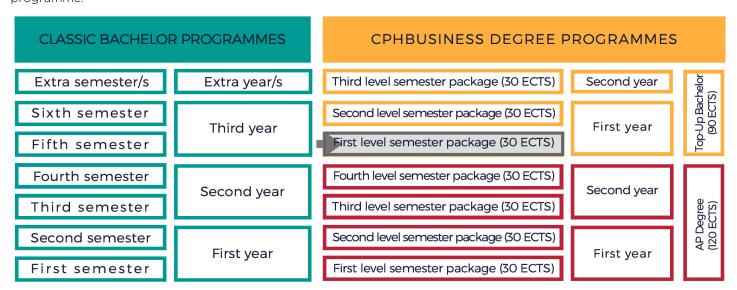

You can use this description to get an idea about what kind of subjects you are going to study, but please note new subjects might be added or there will be changes in the amount of ECTS per subject.

We will update the semester description as soon as possible.

The courses of this semester package take place at Cphbusiness Lyngby (Nørgaardsvej 30, 2800 Kgs. Lyngby) during the autumn semester 2018.

#### 1. An illustration of the level of the semester package

The first semester of the Top-Up Bachelor in Sport Management is equivalent to the fifth semester of a classic Bachelor programme.

#### 2. Admission requirements

#### Academic requirements

#### BEFORE YOU APPLY FOR THIS SEMESTER PACKAGE

MAKE SURE YOU HAVE THE FOLLOWING:

At least 2 – 3 years (equivalent to an AP Degree - 120 ECTS) of undergraduate studies within the field of Business including:

- Marketing/Strategy 15 ECTS
- Service Management/Organisation etc. 20 ECTS
- Business Economics/Financial Management 15 ECTS
- Event Management/Experience Economy or equivalent 5 ECTS
- Methodology/Research Methods 5 ECTS

#### Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

#### 3. Practical information

Places on our top-up programmes are limited. Students who apply for a semester on a top-up programme will be required to send extra documentation to prove they fulfil the above-mentioned criteria. Only students with the relevant background and highest grades will be admitted.

Make sure your second option is a semester package at AP Degree level and that both your options are approved by your home institution before applying.

#### 4. Information about exams

An interdisciplinary exam covering all subjects described in the table below will be organized at the end of the semester. The exam is divided in two parts: an individual written exam hand-in in December and an individual oral exam in January.

For general information about exams and grading scale, please check the relevant chapter.

#### 5. Description of subjects and teaching

Subject	Contents	ECTS
Sports Industry	Sports Enterprises and Surrounding World Sports and Health Event and Leisure Industry Importance of Globalization	5
Sports Marketing 1	Consumer Behaviour Sponsorships and Fundraising Event Management Promotion Partnerships	10
Sports and Event Management 1	Strategy Organisation and Management Theories Strategy and Organizational Development	5
Sports Economics 1	Strategic Financial Analysis Sports Economics	5
Methodology and Research in Sports	The relationship between knowledge, methodology and results in the connection with scientific research in sport management.  Qualitative and quantitative methods in sports Investigations and dissemination of knowledge	5

# **Courses in Web Development**

#### \*L-WED-1-E-18 (Web Development level 1 Lyngby)

The courses of this semester package take place at Cphbusiness Lyngby (Nørgaardsvej 30, 2800 Kgs. Lyngby) during the autumn semester 2018.

#### 1. An illustration of the level of the semester package

The first semester of the Top-Up Bachelor in Web Development is equivalent to the fifth semester of a classic Bachelor programme.

CLASSIC BACHELOR PROGRAMMES		CPHBUSINESS DEGREE PROGRAMMES			
Extra semester/s	Extra year/s	Third level semester package (30 ECTS)	Second year	helor 5)	
Sixth semester	Third year	Second level semester package (30 ECTS)	First year	Top-Up Bachelor (90 ECTS)	
Fifth semester	Trilla year	First level semester package (30 ECTS)	That year	Top-1	
Fourth semester	Second year	Fourth level semester package (30 ECTS)	Second year		
Third semester	Second year	Third level semester package (30 ECTS)	Second year	gree CTS)	
Second semester	First voor	Second level semester package (30 ECTS)	First voor	AP Degree (120 ECTS)	
First semester	First year	First level semester package (30 ECTS)	First year	Ш	

#### 2. Admission requirements

#### Academic requirements

#### BEFORE YOU APPLY FOR THIS SEMESTER PACKAGE

MAKE SURE YOU HAVE THE FOLLOWING:

At least 2 – 3 years (min. 120 ECTS) of undergraduate studies within multimedia design, communication, and interaction development including:

- Design and Visualisation 30 ECTS
- Communication and Presentation 30 ECTS
- Interaction development 30 ECTS

#### Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

#### 3. Practical information

Places on our top-up bachelor programmes are limited. Students who apply for a semester on a top-up bachelor programme will be required to send extra documentation to prove they fulfil the above-mentioned criteria. Only students with the relevant background and highest grades will be admitted.

Make sure your second option is a semester package at AP Degree level and that both your options are approved by your home institution before applying.

#### 4. Information about exams

There will be an exam concluding each of the subjects mentioned below. Each will be graded according to the 7-point grading scale.

For general information about exams and grading scale, please check the relevant chapter.

#### 5. Distribution of subjects:

Subject	ECTS
Back-end Programming	10

#### Back-end Programming

#### Content:

The purpose of this core area is to develop students' competencies to develop contemporary web applications using programming paradigms and taking advantage of current, standardised protocols and the possibilities of the client/server model.

#### Learning objectives:

#### Knowledge

The graduate will possess knowledge of:

- design patterns
- fundamental protocols of the World Wide Web
- the advantages and limitations of client/server architecture

#### Skills

The graduate will be able to:

- create web-based programs
- apply basic programming principles
- use web APIs

document program structures

#### Competencies

The graduate will be able to:

- analyse a development request with a view to constructing a web-based application
- select and apply suitable programming technologies for developing web-based applications mainly focusing
  on the server side

Databases 10

#### Content:

The purpose of this core area is to develop students' competencies in analysing and applying relevant data-processing models.

#### Learning objectives:

#### Knowledge

The student will possess knowledge of:

- at least one widely-used modelling language for data modelling
- distributed databases and their prevalence and use in web contexts
- describing problems concerning data exchange and the use of data formats in developing in web contexts Skills

The student will be able to:

- apply data models for development and maintenance in web contexts
- apply complex database queries
- apply transactions
- embed business logic in the database layer
- use data formats for data integration

#### Competencies

The student will be able to:

- analyse and select the tasks that would be suitably placed in the database layer and those that should be placed in the application layer
- analyse and select a database technology/technologies that will resolve a given development task in a web context suitably

Interface Design 10

#### Content:

The purpose of this core area is to develop students' competencies to enter complex usage scenarios and independently take part in the design process concerning the design of complex user interfaces.

#### Learning objectives:

#### Knowledge

The student will possess knowledge of:

- common interface design development methods
- human-computer interaction
- communication theory

#### Skills

The student will be able to:

 create convenient user interfaces adapted to relevant target groups based on the theory and methods of the relevant subject area

- apply design methods pertaining to visual design, interaction design and information architecture when
  designing user interfaces, including prototyping
- work on the development of communications solutions across platforms and media Competencies

The student will be able to:

- analyse choices of devices and effects in user interfaces and situate these choices in a context
- manage design processes based on analysis and planning
- take part in complex usage situations and independently manage
- the design process when designing complex user interfaces

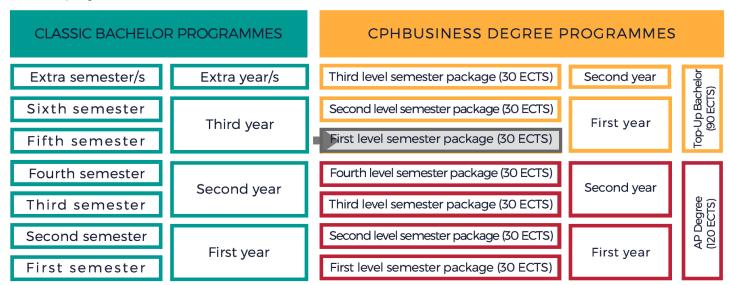

# **Courses in Software Development**

#### \*L-SOD-1-E-18 (Software Development level 1 Lyngby)

The courses of this semester package take place at Cphbusiness Lyngby (Nørgaardsvej 30, 2800 Kgs. Lyngby) during the autumn semester 2018.

#### 1. An illustration of the level of the semester package

The first semester of the Top-Up Bachelor in Software Development is equivalent to the fifth semester of a classic Bachelor programme.

#### 2. Admission requirements

#### Academic requirements

#### BEFORE YOU APPLY FOR THIS SEMESTER PACKAGE

MAKE SURE YOU HAVE THE FOLLOWING:

At least 2 - 3 years (150 ECTS) of undergraduate studies within computer science including

- Object Oriented Programming 40 ECTS
- Object Oriented Analysis and Design 30 ECTS
- Distributed Systems 15 ECTS
- Databases 10 ECTS

#### Language requirements

Students MUST have English qualifications corresponding to TOEFL 550 or IELTS 6.0. - <u>level B2 on CEFR</u> (Common European Framework for Languages) in order to be able to participate in class. Official language tests are not required, but we recommend our partner institutions ensure that nominated students' level of English meets the above-mentioned criteria.

Please note a student's ability to read, write, speak and understand English will highly influence the quality of the study abroad period and the student's ability to pass exams.

As an extra service to our international exchange students and partners, and to ensure a satisfactory academic outcome of the students' stay here, we may use Skype/telephone conversations with nominees before accepting them for a study programme.

#### 3. Practical information

Places on our top-up bachelor programmes are limited. Students who apply for a semester on a top-up bachelor programme will be required to send extra documentation to prove they fulfil the above-mentioned criteria. Only students with the relevant background and highest grades will be admitted.

Make sure your second option is a semester package at AP Degree level and that both your options are approved by your home institution before applying.

#### 4. Information about exams

There will be an exam concluding each of the subjects mentioned below. Each will be graded according to the 7-point grading scale.

For general information about exams and grading scale, please check the relevant chapter.

#### 5. Distribution of subjects:

Subject	ECTS
Exploration and Presentation	5

#### Contents:

The educational element Exploration and Presentation will contribute to the student's ability to explore and present knowledge relevant to professional software development on a methodological and systematic basis. The student should be able to reflect on the industry's as well as his/her own practice and thereby contribute to the development of the profession.

#### Learning Objectives:

Knowledge

The student has knowledge about:

- Key concepts in academic studies
- Types of sources and their quality
- Methodology and quality assessment of data and knowledge
- Different forms of communication

Skills

The student can:

- Identify and define problems and issues
- Choose suitable research methods for a given problem
- Carry out investigations methodically
- Draw conclusions from the results of the studies and outline these
- Convey the study to well-defined audiences

Competencies

The student can:

- Find and quality assess sources of professional knowledge
- Contribute to the creation of new professional knowledge through systematic studies and exploration.

Systems Integration 10

#### Content:

This subject element must help ensure that the student develops the competencies to be able to work with technical system integration. After completing this module, the student must be able to integrate existing systems in connection with the development of new systems, and develop new systems supporting future integration.

#### Learning objectives:

Knowledge

The student must have knowledge of:

- Business considerations in relation to system integration
- Standards and standards organisations
- Storage, transformation and integration of data sources

- The concept of services and their ties to service-oriented architectures
- Technologies which can be used to implement a service-oriented architecture
- Tools for integration

#### Skills

#### The student can:

- Use an object-oriented system in a service-oriented architecture
- Design a system that is easy to integrate with other systems, and uses existing services
- Transform or expand a system so that it can function in a service-oriented architecture
- Use patterns that support system integration
- Integrate generic and other systems
- Choose from various integration methods
- Translate elements in a business strategy into specific requirements for system integration.

#### Competencies

#### The student can:

- Choose from various integration techniques
- Acquire knowledge of developments in standards for integration
- Adapt IT architecture to take into account future system integration.

#### Development of Large Systems

10

#### Content:

The aim of the subject element is to train the student to develop large- scale IT systems, where scalability is a key characteristic. The student must have knowledge of how key system development methods handle issues related to scalability and the development of large distributed systems. The student must have knowledge of concepts, techniques and technologies for the continuous integration and delivery of software-based systems. The student must be able to design, implement, and maintain large distributed systems in distributed development teams.

#### Learning objectives:

#### Knowledge

The student must have knowledge of:

- Issues related to the development of distributed and large-scale IT systems, and how disciplined and agile development methods prescribe how these issues should be handled
- The advantages, disadvantages and costs of using a system for the continuous integration and delivery of IT systems
- Quality criteria for the design of interfaces to subsystems
- Configuration and error reporting systems dedicated to the development of large distributed systems

#### Skills

#### The student can:

- Apply techniques for dividing a system into subsystems
- Design and specify requirements for subsystems
- Use version control systems dedicated to the development of large distributed systems in a distributed development team
- Use a system for continuous integration and delivery
- Use architecture patterns dedicated to the development of large distributed systems

#### Competencies

#### The student can:

- Cooperate in large systems development organizations
- Participate in globally distributed development
- Adapt development methods and processes to the development of large distributed systems.

#### Elective subject

5

#### Students must choose from below:

#### **Business Intelligence (5 ECTS)**

#### Contents:

The course consists of two blocks. A first block on fundamentals of data processing and a second block on basics of statistical modelling and machine learning. The first block gives an introduction to the programming language Python, shows how to apply it to collect data from various sources, preprocess data and to visualise data with different mechanisms. The second block focuses on how to apply Python's scientific libraries to answer various business questions with the help of appropriate statistical models and machine learning techniques.

#### Learning Objectives:

#### Knowledge

The student will possess knowledge of:

- Python programming language constructs and basic scientific API usage.
- Different representative business questions and how to answer them with the help of appropriate statistical models and machine learning mechanisms and technologies.
- Basic terminology of Business Intelligence, Machine Learning, and Data Science.

#### Skills

The students will be able to:

- Write Python scripts and programs using common language constructs in the read-eval-print-loop (REPL), "Jupyter Notebooks", as well as stand-alone programs.
- Collect and download data from various sources programmatically, including different file formats and data distributed on the web.
- Apply Python's scientific libraries (Numpy and Pandas) for preprocessing, filtering and analysis of data.
- Create various types of plots programmatically to share insight into data.

#### Competencies

The students will be able to:

- Have a basic understanding and knowledge of various terms, models and tests in statistics.
- Compute basic statistics on data using the Python's scientific stack and the Sklearn library.
- Develop an informed guess of when to choose a certain model to answer a concrete type of question and apply technology appropriately.

#### Discreet mathematics (5 ECTS)

#### Contents:

The course focuses on logic and its use in computer science applications.

#### Learning Objectives:

Knowledge

The student will possess knowledge of:

- Logic and reasoning
- Predicates and quantifiers
- Set notations and set theory
- Regular expressions and finite-state automata
- Sequences and induction
- Relations
- Static analysis and Design by Contract

#### Skills and competencies

The student will be able to:

- Reason for the correctness of statements using Boolean algebra and truth tables
- Write small programs in a program based on predicate logic
- Understand the properties of sets and operations on sets
- Implement and use regular expression as a finite-state automaton to evaluate a language.
- Optimize code using induction rules, understand the basics of recursion
- Understand the properties of relations and the basis of databases and static analysis
- Create simple static analysis and write code in a Design by Contract language (C#)

Erhvervsakademiuddannelse inden for international handel og markedsføring (markedsførignsøkonom AK) approved January 2017

# **CONTENTS**

1. Framework	2
1.1. Overview 3 <sup>rd</sup> semester	
1.2. Overview of the elective modules and the process	2
1.2.1. Module 1	3
1.2.2. Module 2	3
2. Elective Educational Elements	4
2.1. Digital Marketing Hands On - (10 ECTS)	4
2.2. Service Marketing and Management	7
2.3. SOME Strategy & Online Communication – Hands on – (10 ECTS)	8
2.4. Sponsorship	11
2.5. Consumer Behavior & Sensory Branding	13
2.6. Entrepreneurship	15
2.7 Statistics & Managerial Economics (10 ECTS)	16

# 1. FRAMEWORK

This electives catalogue is an appendix to the curriculum for Marketing Management (AP), which is composed in compliance with the ministerial order BEK nr. 1047 of 02/12/2016 by the Danish institutions of higher education approved to offer the particular programme. The electives catalogue is an institution specific part of the curriculum.

# 1.1. Overview 3<sup>rd</sup> semester

The 3rd. semester consists of 3 modules. The first module is mandatory and has internationalization as a theme. Hereafter the semester consists of two elective modules. Each of the three modules will be completed with an exam.

Mandatory module	Elective module 1	Elective module 2
Week 34-40	Week 41-47	Week 48-2

Each of the modules represents 10 ECTS points.

# 1.2. Overview of the elective modules and the process

Cphbusiness offers the following elective courses in two modules, and all students must have completed 2 \* 10 ECTS credits of electives during the 3rd semester.

Some of the electives are composed of 'packages' of 5 ECTS points and if e.g. a student elects Statistics, so she or he automatically also elects Managerial Economics. It is not possible to get dispensation for this rule.

All students must wish at least 3 elective courses (10 ECTS) per module. We have to put the attention to the fact that we cannot guarantee that all courses are conducted and it is also a risk that some elective modules will be oversubscribed. The process of election is as follows: All students will receive a mail with a link to Survey. The process is handled by the Front desk in the administration in Nansensgade.

### 1.2.1. Module 1

Elective	Subjects	ECTS points
1	<u>Digital Marketing Hands On</u> Visual communication & identity Webdesign and SEO	5 5
2	Entrepreneurship	10
3	Statistics/Managerial Economics	5 5
4	Sevice Marketing	10
5	Sponsorship	10

# 1.2.2. Module 2

Elective	Subjects	ECTS points
1	SOME Strategy Online Promotion – Hands on	5 5
2	Sponsorship	10
3	Entrepreneurship	10
4	Statistics/Managerial Economics	5 5
5	Consumer Behavior & Sensory Branding	10

#### 2. Elective Educational Elements

The elective educational elements areas cover a range of education elements that correspond to 20 ECTS credits. Students can wish for the following elective elements listet randomly:

### 2.1. Digital Marketing Hands On - (10 ECTS)

- Visual communication & identity
- Webdesign and SEO

#### **Visual communication & identity**

**Timing:** 3rd semester

**Scope:** 5 ECTS

#### **Contents:**

- In business life there is a high demand for experts who combine their theoretical understanding of digital marketing with practical, operational competences in the fast expanding field of digital marketing. The students will choose the companies they want to work with. The companies can be own business models.

#### Competencies

The graduate will be able to:

• Vectorgraphic and photographic communication products in line with the company's brand, identity and value proposition

#### **Assessment:**

Written and oral case-exam.

#### Literature:

Cphbusiness will provide the students access to the relevant programs.

Electronic compendium

#### **Webdesign and SEO Optimisation**

**Timing:** 3rd semester

Scope: 5 ECTS

#### **Contents:**

- In business life there is a high demand for experts who combine their theoretical understanding of digital marketing with practical, operational competences in the fast expanding field of digital marketing. The students will choose the companies they want to work with. The companies can be own business models.
- The principal areas of interest will be web design, visual identity, social media marketing and search marketing (SEM and SEO). We will also examine the opportunity of using digital crowdsourcing or crowdfunding platforms.

#### Web design

- o Analysis and design or redesign of websites and mobile sites
- Hands On tools: Hands On tools: Web editor, Content Management System.

#### • Search marketing

- Analysis and optimization of websites (SEO)
- o Hands On tools: SEO compendium

#### **Learning Objectives:**

#### Knowledge

The graduate will possess knowledge of:

- Web design, SEO, usability and user experience
- Content Management Systems and widgets

#### Skills

The graduate will be able to:

- Suggesting the design or redesign of a website's structure, user experience and conversion
- Suggesting search engine optimization

#### Competencies

The graduate will be able to create:

- Relevant websites and social media pages
- Enhanced search optimization

#### **Assessment:**

• Written and oral case-exam.

#### Literature:

Cphbusiness will provide the students access to the relevant programs.

**TBD** 

## 2.2. Service Marketing and Management

#### **Service Marketing and Management**

#### Skills

The graduate will aquire skills on how to:

- Create online advertising, texts, permission marketing and content
- Recommend use of targeting
- · Recommend media choice
- Establish objectives, budgets and ROI as well as evaluation

#### Competencies

The graduate will be able toaquire competences on how to:

• Be able to create a mixed media campaign based on a company's strategy

#### **Assessment:**

Written individual exam

#### Literature:

TBD

# 2.4. Sponsorship

# Sponsorship Timing: 3rd semester Scope: 10 ECTS Purpose:

• The purpose of the elective is to place sponsor activities into a marketing and

sales framework where sponsoring strengths and weaknesses are in focus. It is based on the company's strategic and tactical communication needs. The students will not only gain a theoretical understanding but by the inclusion of a number of best-case examples from Denmark and internationally also gain insight and competence in best-in-class sponsorship activation. The work with sponsor activities focuses on sports and culture and to a lesser extent NGOs and social activities.

#### **Contents:**

- Sponsor activities in historical perspective
- Sponsor business in international perspective trends
- Sponsorship theory and models Strengths / Weaknesses
- The company's communication needs
- Companies' use of sponsorships in Danish and international perspective
- Sports sponsorships including e-sports
- Cultural sponsorships
- sponsorship activation
- sponsorship measurement RoI analysis models
- Sponsorship valuation
- Sponsorship in a CSR and HR perspective

#### Title:

Companies' commercial use of sponsorship in sport and culture

Objective: the student must achieve a high professional insight in sponsorship
activities, which sponsor active activities to include in the company's marketing
and sales activities. Work is both strategic as well as at a tactical and
operational level, the students obtain skills in particular sponsorship specific
research, impact measurement (Return on Investment), sponsorship value
setting and activation. Sponsorship as a marketing and sales tool, students
should be able to conduct analysis in sports and culture and with both
marketing, cultural and international perspective

#### **Learning Objectives:**

#### Knowledge

The graduate will possess knowledge:

- sponsorships role, strengths and weaknesses in the company's parameter mix, both service and manufacturing companies
- sponsorship activities online and offline
- sponsorships special rights matters, including IP rights and special S & E Rights (Sole & Exclusive)
- Sponsorships in historical perspective and significance today

• Trends in sponsorships including an understanding of the difference in culture, respectively sports sponsorship.

#### Skills

The graduate will be able to:

- setting goals for and use of sponsorship in national and international perspective
- handle sponsorships sales activities including relationship building, hospitality and competitions
- to use the sponsorship to various media platforms / genre offline and online
- the valuation and effect measurements for sponsorships
- use of sponsorships in CSR context
- activate corporate sponsorships in various sales channels

#### Competencies

The graduate will be able to:

 use sponsorships in national and international perspective as part of the company's marketing

#### **Assessment:**

Written exam

#### Literature:

• Guy Masterman: Sponsorship – for a return on investment

Butterworth-Heinemann, 2007 ISBN: 13:978 0 7506 8640 2

#### E-book:

# 2.5. Consumer Behavior & Sensory Branding

#### **Consumer Behavior & Sensory Branding**

**Timing:** 3rd semester

Scope: 10 ECTS

#### **Contents:**

Getting the consumers' attention is becoming more and more difficult.

Companies and brands are fighting against each other – not only to get the attention of the consumers. They also have to persuade the consumers choosing their brand over the competitors. Meanwhile the consumers are becoming more and more skeptical towards all kinds of advertising.

- All this combined forces the companies to get even closer to the consumers to obtain a deeper understanding of them. In addition the companies have to become more creative in communicating to/with their target groups.
- Thus, the elective 'Consumer Behavior and Sensory Branding' digs deep into the minds of the consumer. We want to figure out what drives the consumers' behavior when they go from information seeking to evaluation of alternatives, to purchase, to re-evaluation and recommendation/feedback?
- Furthermore, the elective focuses on how the marketer can benefit from neuro marketing by appealing to more or all of the customers' senses.
- The teaching is based on normal lectures, external presentations, cases, field studies as well as the students' own sources of information.

#### **Learning Objectives:**

#### Knowledge

The graduate will possess knowledge:

Central theory about consumer behavior
 including motivation, information seeking, buying decision and evaluation. Understanding of the five (or six?) senses and knowledge about how they can be activated and thereby influence consumer behavior

#### Skills

The graduate will be able to:

• To put theory into practice with a focus on the B2C market

#### Competencies

The graduate will be able to:

• To recommend and develop specific initiatives – e.g. a campaign for a specific product to a specific target group

#### **Assessment:**

Oral exam

#### Literature:

## 2.6. Entrepreneurship

#### **Entrepreneurship**

**Timing:** 3rd semester

Scope: 10 ECTS

#### **Contents:**

- Is being entrepreneurial part of your DNA?
   Your reflection is..."Entrepreneurship is having a cool idea, start my own
   business in the apartment, with at few friends and with the support of SU".
   Next step simply to expand into a million or perhaps billion Euro business
   in a couple of years and having your profile on the cover on EUROMAN or the
   Financial Times"
- Those who have actually made it this far, that has a start-up and is an entrepreneur, know that this only comes from hard work, many long hours and this attitude is exactly what you need in this elective!
- HOW?

You have this invitation into a universe of innovation and business development, and a travel to learn how these and more dimensions can be put into the mindset, the processes and the tools which start-ups, scale-ups and existing companies can work with in order to 'reality checke' their entire value creation.

We call this framework 'The Helix Winner Wheel', a model we have developed as our point of reference when we facilitate and coach executives in Danish companies. This is also our starting point for this elective.

WHAT?

All the learning and experiences you have gained at Cphbusienss so far are being put into play. This in order to test your entrepreneurial mindset, develop real business understanding and at the same time also prepare your for exiting challenges during 4th semester with internship and final paper.

		<b>~</b> I '

# 2.7. Statistics & Managerial Economics (10 ECTS)

Statistics	
Timing: 3rd semester	
Scope: 5 ECTS	

#### **Contents:**

 The purpose is to bring the student theoretical and practical knowledge about the use of probability mathematics in relation to market analysis. The student must, independently, and based on theory of statistics, be able to collect and assess market and sales potential for a specific sales problem.

#### **Learning Objectives:**

#### Knowledge

The graduate will possess knowledge:

- Descriptive statistics and probability testing
- Stochastic variables and probability distribution
- Scaling
- Regression analysis
- Analysis of variation

#### Skills

The graduate will be able to:

- calculating and interpreting various measures of central tendency and variation
- making probability calculations for stochastic variables/ probability distributions
- making, implementing and analyse a regression model with one or more explanatory variables, including Dummy variablesCommunication

#### Competencies

The graduate will be able to:

- independently be able to interpret a regression model with one or more explanatory variables for a specific market- and sales problem
- assessing specific probability calculations in relation to market- and sales problems
- assessing descriptive statistics of market- and sales problems

#### **Managerial Economics**

Timing: 3rd semester

**Scope:** 5 ECTS

#### **Contents:**

- Basis for and extended understanding of the cost structures, cost calculations and choice of different alternatives, including opportunity costs
- Basis for and extended understanding of the marketing-related significance of pricing based on marketing and cost-related conditions in different market structures
- Basis for and extended understanding of investment decisions based on sensitivity analyses/break-even analyses before and after taxes
- Basis for and extended understanding of types of financing/funding concepts, including leasing and criteria for comparison and selection both before and after taxes

#### **Learning Objectives:**

#### Knowledge

The graduate will possess knowledge:

- Relationship between the sourcing and production factors and production of goods and services
- The influence of different market structures on the parameter activity
- The classical cost distribution systems as well as activity-based cost systems (ABC costing)
- Conducting ordinary cost and profitability calculations in the short/long run
- Choice of investment opportunities before and after taxes
- Economical optimum lifetime and time for replacement in connection with investments
- Listing of investment calculations as basis for the choice of strategic alternatives with a long-term timeframe
- The significance of the financing concept for the choice of solutions

#### Skills

The graduate will be able to:

- Applying core cost concepts related to making decisions
- Optimising the parameter action based on cost and marketing conditions

- Optimising the sale on a market with price sensitivity and a market with constant sales price
- Conducting sensitivity analyses in connection with investment considerations
- Conducting calculations of capital requirements and payment flows as basis of a listing of investment calculations both for fixed and current assets
- Conducting calculations of the effective interest rates of various loans and credits before and after taxes
- Justify the choice of funding concepts including debt and equity used in connection with investments in fixed and current assets
- Introducing and communicating financial solutions

#### Competencies

The graduate will be able to:

- Independently assess economic consequences of planned marketing activities
- Independently identify and analyse investment and finance opportunities qualitatively and economically as regards specific planning assignments

quantatively and economically as regards specific planning assignments
